## IAS 5

## New 5th-Generation Software Package

### Empower your Team with IAS 5

We are relentless in our efforts to empower our customers to do what is needed to deliver and maintain aircraft. The AVDS Client is our in-house tool that makes all this possible. IAS 5 builds on this legacy with even more empowerment, capability, and simplicity.

### User-Friendly Interface: Diagnostics in minutes!

IAS 5 is the culmination of over four years of teaming up and actively listening to installers and maintenance professionals, designed to empower end-users to easily and efficiently troubleshoot on their own, providing with immediate, detailed information and diagnostic tools that allows our customers to easily assess most interconnecting systems' performance.

### Troubleshoot Smarter, not harder!

Innovative Advantage's new IAS 5 software package builds on the existing capabilities, adding new advanced functionality and additional layers of robustness to the AVDS system.

### Inspired by Our Customers

"IAS 5 is the next big leap forward in our life's work: making it easy for installers and maintenance personnel to provide passengers with the absolute best cabin experience. The glamour of the 4K, the surround sound, the perfect A/V of the AVDS System is just the tip of the iceberg... Beneath the surface is where the real magic happens!"

 Greg Cornell, President at Innovative Advantage

#### Safe Mode

Enhanced intelligent system monitoring isolates and shuts down specific problems in the AVDS system.

#### Intelligent Auto-Checking

Continuous system monitoring provides specific error log statements and clear instructions to technicians.

#### One-Click Snapshot

Red/green health status immediately reported to the user. Actionable messages based on the health report, and Cloud upload to IA support.
